**Description**

**DETAILS**
The Ignite auger drills holes in daunting jobs with straight-up precision and performance. It bites through tough materials thanks to its productive torque ratio at any rpm. With its self-balancing alignment, the auger easily positions itself for a straight, vertically accurate hole, even when working on slopes and uneven surfaces.
**Features & Benefits:**

The Ignite 75DDH Direct Drive Hex auger quickly drills through hard-to-penetrate materials to a depth of 50 inches with a standard bit or up to 86 inches with an optional extension. With its flow range of 8-20 gpm, it works quickly in a wide range of applications.
A powerful design delivers high-torque, high-performance digging at a steady rate, with plenty of power for tough conditions, including clay, rock, frozen surfaces and more. With its simple, economical design and construction, it’s also easy to maintain.
With its unique joint between the mounting frame and drive unit, the auger attachment always makes a straight, vertical hole—even when your loader stands on uneven terrain.

**Top Tasks:**

Deck construction, playground equipment
Foundations
Utilities
Fence installation
Road sign, light pole installation
Tree and shrub planting
Pole sheds and outbuildings

**How It Works:**

The Ignite auger utilizes the hydraulic power of your machine to rotate the auger bit. The tip of the bit penetrates the soil, easily breaking up hard surfaces while the auger rotation lifts dirt from the hole as you dig.
Warranty: 12-month warranty

**General Information**

Attachment Interface
Universal Quick-Attach

**SPECS**

Overall Width
45 in.
Drive Unit Width
9.38 in.
Drive Unit Height
33.5 in.
Weight with Mount
315 lb.
Max Bit Size
24 in.
Drive Shaft
2 in. Hex
Pressure Range
2,000 - 3,500 psi
Torque @ 3000 psi
1,118 lb/ft
Max Flow
20 gpm
Speed at Max Flow
161 rpm
Quick Couplers
Faster Flat Face (CUP)

**Options**

Hex-to-Round Adapter, 24 in. Extension, 36 in. Extension
