Description

2025 Boss Snowplow Drag Pro 180Z

Get your rear in gear with a DRAG PRO 180Z- the most versatile rear-mounted system available, with multiple blade positions and the ability to plow forward and in reverse. The DRAG PRO 180Z mounts from the rear using a universal fifth-wheel rail system and a receiver hitch, allowing you to pull snow from the back while clearing large areas like commercial parking lots. Rotating wings allow the operator to adjust quickly to various plowing situations, surface areas and job types. With

advanced stability from the two-point attachment system the operator can freely plow forward, in reverse and in the Z-position.
