Description

SPHS Series

Built for lasting performance and versatility, our SPHS Series trailers are designed to tackle a wide range of hauling demands with ease. Featuring fully welded steel construction, the streamlined design ensures reliable functionality across various tasks. With 13" tires for added stability and a smoother ride, these trailers deliver the essential versatility you need for any job

Equipped With

Steel Mesh Floor

Lighter than solid wood floors, increasing payload capacity, the steel mesh provides great traction for items being transported, and loose debris can be swept through the mesh pattern for easy cleanup.

Mesh Sides

Mesh sides provide secure containment for bulk cargo, debris, and loose materials, reducing the risk of loss during transit and ensuring safe, efficient transport.

Versatile Gate Design

The gate folds down to serve as a ramp for easy loading/unloading, or it folds into the trailer bed when needed to accommodate various cargo and reduce wind resistance during transport.

E-Z Lube Axle

Simplifies maintenance by allowing easy lubrication of both inner and outer bearings without disassembly, saving time and effort while also resulting in smoother operation.

Straight Tongue

The straight tongue design offers enhanced maneuverability for easy navigation in tight spaces while maximizing space efficiency for convenient storage when not in use.
