2018 New Holland GENESIS® T8.380GENESIS® T8 SERIES - TIER 4BNOW, EVERYTHING IS POSSIBLE WITH THE GENESIS® T8New Holland DNA runs through every aspect of GENESIS® T8 Series tractors, which means you'll notice unique, innovative features that make you and your operation more productive. Power, fuel efficiency, stability and maneuverability are all rolled into this one-of-a-kind tractor.GENESIS T8 tractors carry the legendary GENESIS name—a proud reminder of the original GENESIS tractors that redefined what was possible 20 years ago and proved an instant success with the nation's farmers. True to the GENESIS name, today's GENESIS line is still redefining what is possible, continuing the legacy. You too can be part of the GENESIS legacy.POWERFUL PROOF IS IN THE NUMBERSECOBlue™ HI-eSCR improves engine performance. Every GENESIS® T8 tractor delivers higher rated and maximum power to boost your output. Look at the numbers. A GENESIS ® T8.320 is rated at 250 engine horsepower but with Engine Power Management (EPM) will produce up to 320 horsepower. The same story is true for every GENESIS® T8 model. When you get to the mighty GENESIS® T8.435, it has an engine rated horsepower of 380 but will put out up to 435 horsepower using EPM technology.HANDLE THE MOST DEMANDING TASKS WITH EASEGENESIS® T8 tractors are the best choice for farmers and custom operators alike. They make it possible to improve efficiency and productivity in all types of fields and in the most challenging conditions. The revolutionary, precision-designed front-end allows an impressive 55° turning angle for tight end-of-row turns. And with the longest wheelbase in its class, the GENESIS® T8 delivers unmatched stability and impressive draft performance. Whether you're planting, digging sugar beets, or pulling a grain cart, you can rely upon your GENESIS® T8 to tackle the toughest tasks and deliver maximum performance and dependability while doing it.OUTSTANDING VERSATILITY. UNSURPASSED PRODUCTIVITY. WELCOME TO HIGH-PERFORMANCE FARMING.GENESIS® T8 Series tractors continue to reinvent the concept of high-horsepower farming. New Holland's SmartTrax™ rear track system unlocks the true potential of your GENESIS® T8 tractor. The SmartTrax has a larger footprint allowing you to go even beyond what is possible with standard tires for more productive farming. You get the choice of numerous track spacing and belt widths. The benefits are many: reduced compaction, increased efficiency, better traction, enhanced stability. Twin track systems have been integral in farming operations for many years. Increased traction with reduced compaction has been the main selling point of twin track systems, but they have their downfalls. Now, New Holland is totally reshaping how the industry defines twin track systems.MORE POWER AND PRODUCTIVITYGENESIS T8 Series tractors are the most powerful conventional tractors in the world.ABSOLUTE DRIVING PLEASURENew Holland's award-winning SideWinder™ II armrest makes the GENESIS T8 Series intuitive to operate.MAXIMUM VERSATILITYThe GENESIS T8 wheelbase is the longest in the industry for a smooth, stable ride, yet the sculpted frame design makes these tractors the most maneuverable in this class.LOWER OPERATING COSTOperating costs for the GENESIS T8 tractors with ECOBlue HI-eSCR technology have been maintained when compared to T8 Tier 4A tractors.
