Proud to be building rear sliding doors as well as sliding side doors.
Doors in most cases can be built ahead of time with just two measurments, and installation can be done in one day in most cases. This process allows for out of town customers to be able to drop off trailer in the morning and go home later in the afternoon.
Our features:
Powdercoated frames
Tig welded frames

Shatter resistant poly-carb glass
Flush mounted glass for smooth look and great for decals
Dust seals
Top loop of door frame only drops 3" from ceiling, which is less than rear door opening, so no interior height is lost.
"If it fits in the rear door, it will fit throught ours"
Lights also available for between doors and ramp
