Description

Bobcat UV34XL Gas, Cab & Heat Package Utility Vehicle

When you need to haul more materials, tow heavier loads and transport more people, the UV34XL does it all.
This 39.9-hp utility vehicle, also known as a side-by-side UTV, offers seating for six people and includes a 1,000cc, two-cylinder SOHC engine that delivers high-performance power, maximum reliability, durability, plus gas-engine convenience.

The large, 900-watt stator provides about 75 amps of output for use with the snow blade and other electric-powered accessories, while the electronic fuel injection offers the best starting performance in all seasons.
A large cargo box with a durable composite interior stands up to tough cargo and materials, retaining its strength (and good looks) for years.
All that, plus the Bobcat® UV34XL offers all-wheel drive, convenient service access, improved ground clearance and increased tow rating – just what your toughest projects demand.
