Sales Price: $25,795.00

Description

This hybrid trailer lowers flat to the ground for safer, easier and faster loading and unloading as well as being a full-blown dump trailer. With a load capacity of 10,000 lbs and a dump capacity of 8,000 lbs, the "3D" trailer is ideal for moving your skid steer to the job site then loading and hauling debris. With a dual fold-down/spreader tailgate, you have the option of how you load and unload your equipment and materials.

This Air-Tow model features its unique, exclusive Floating Torsional Rubber suspension system with floating axles mounted in a heavy duty roller bearings. The suspension has a progressive spring rate, the further it is compressed the stiffer it becomes. It is gradually stiffened according to the load being applied by progressively increasing in proportion to the load. The rubber suspension can withstand severe shock loads at maximum capacity without bottoming out which greatly reduces forces transmitted to the trailer frame and cargo.
