Integrated One Piece Aluminum Tube Headache Rack
Our headache racks are designed with the best and strongest materials, designed to set the standard when it comes to safety and protecting our customers.
4? structural steel channel frame rails
Because we don't use roll-formed runners, our structural 4? channel frame rails are stronger and more durable than any on the market. They also prevent any rusting from the interior of the tube.
30,000 lb.-rated B&W gooseneck hitch with 7-way electrical plug
This is a best-in-class, independently tested gooseneck hitch that handles even your toughest hauls. It also contains a 7-way electrical plug to give you ample choices for your power-driven needs.
3/8" x 2" Aluminum Rub Rails & Stake Pockets
These side rails will help secure your toughest loads while providing multiple tie-down points throughout your hauling jobs.
Extruded Aluminum Deck
Stronger and more durable aluminum floors that win out against the competition.
Aluminum cast insert for LED rear lights and tag
When buying an ER, we know that you are looking for the best-looking, longest lasting materials. That's why we use cast aluminum housings, which look better and won't corrode like many of our competitors' housings.
Modular sealed wiring harness
Our modular sealed wiring harnesses are resistant to corrosion, deterioration and pulling apart, meaning they can withstand the harshest conditions.
7-way round and 5-way flat electrical plug standard on rear tailboard
This standard feature provides quality results and allows you to hook on to any trailer.
24,000 lb.-rated B&W bumper pull hitch
CM's independently rated bumper pull hitch gives you best-in-class towing capacity, which is integrated into the entire frame.
3" Aluminum Extruded Channel
Realize the benefits of our lightweight, more corrosion resistant aluminum structure without any loss in strength.
LED Stop, turn, tail, back-up, and tag lights in skirt
CM's lights are brighter and use less power than conventional incandescent lights, so your stops, turns, and tag lights will be easily seen and recognized.
Aluminum Fenders and Tread Plate Trim
A durable, more corrosion resistant fender with a great look and finish. Stainless fenders are available as an option.
4 lockable, flush integrated toolboxes with chrome T-handle twist compression latches
Our recessed tool box doors provide maximum safety in our large boxes to prevent weathering of your tools and equipment. For security, the dual latches lock with a key and padlock loop when desired.

- Beds designed for a RAM Mega Cab will only have two boxes in the rear to accommodate standards on this chassis.

Angled fuel fill
Provides a shinier, and better-looking feature to your work truck, as well as a no-corrosion zone for all your in-and-out hauls.
