Description

The 2013 Sandsport by Pacific Coachworks SL M-24FBSL is a self-contained travel trailer toy hauler featuring a length of 29 feet and a dry weight of 7,120 pounds.
Key Specifications
RV Type: Travel Trailer / Toy Hauler
Length: 29 feet x 8 feet 6 inches
Dry Weight: 7,120 lbs
Axles: 2
Upgraded Morryde Suspension
Tires are 1 Year old
New Awning
Built In Generator
On Board Fuel Station
The 2013 Pacific Coachworks Sandsport 24FBSL is highly optimized for dry camping with solid holding capacities and a cargo-friendly floorplan.
? Tank Capacities
The standard Pacific Coachworks 24-foot class toy hauler chassis holds substantial fluid capacities for extended boondocking:
Fresh Water Tank: 100 gallons
Gray Water Tank: 40 gallons
Black Water Tank: 40 gallons
On-board Fuel Station: 18-gallon to 20-gallon fuel tank with an exterior pump station to supply your toys and generator.
Generator Specs
Standard Unit: Built-in 3500W to 4000W generator (typically a Cummins Onan 4.0kW).
Current hours on gen: 159hrs
Controls: Equipped with a remote indoor switch for easy, push-button starting from inside the cabin.
Power Output: Easily manages the 13,500 BTU ducted air conditioner, microwave, and onboard electrical system.
Layout & Floorplan
The "FBSL" stands for Front Bedroom, Sofa Slide-out, a layout designed to maximize both living space and garage storage:
Front Section: A private master bedroom holding a residential Queen bed with dual wardrobes and overhead cabinets.
Mid Section: Features a full curbside kitchen (refrigerator, microwave, oven, 3-burner cooktop, single-bowl sink) across from a roadside bathroom equipped with a toilet, sink, and tub/shower
Rear Cargo Area: Features a wide-body cargo floor flanked by fold-up/roll-away sofas on the slide-out track.
Overhead Storage & Bed: Includes a rear electric drop-down dual bunks that lifts out of the way near the ceiling when hauling ATVs/UTVs.
The 2013 Pacific Coachworks Sandsport 24FBSL features a 13-foot 6-inch maximum cargo length along the door side, built on a 102-inch (8'6") wide-body chassis.
Garage Dimensions Breakdown
Cargo Length (Curbside/Door-side): 13 feet 6 inches of clear space extending from the rear ramp door up to the first permanent kitchen cabinet fixture.
Cargo Length (Roadside/Driver-side): Approximately 6 feet 2 inches to 7 feet of unobstructed space before reaching the slide-out sofa track or bathroom wall.

Exterior Width: 102 inches (8 feet 6 inches).
Interior Width: Approximately 96 to 98 inches wall-to-wall, narrowing down to roughly 75 to 80 inches of drive-through width between the folded-up roll-away side sofas.
Rear Ramp Door: 7 feet tall (standard for the Pacific Coachworks "SL" series) by roughly 94 inches wide.
Interior Ceiling Height: 7 feet 10 inches (94 inches), though the rear drop-down electric bed reduces vertical clearance by about 8 to 10 inches when pinned at the top.
? What Fits?
This asymmetric layout is optimized to easily fit a standard two-seat side-by-side (UTV), multiple dirt bikes, or a couple of full-sized ATVs parked in tandem along the longer curbside walkway.
