Factory-trained installation is available. Call to get a quote for your application. We offer 24-hour parts and service for BOSS equipment during winter weather events. Our well-stocked parts department insures quick and efficient turnaround on your repairs.

Whether it's snow removal in tight spaces or clearing walkways and sidewalks, BOSS snowplows are engineered to perform in the worst winter conditions. Designed specifically for compact vehicle applications, BOSS straight-blade and V-plow products are fully hydraulic to deliver maximum efficiency with no winches, cables or pulleys. The 6' Poly Straight Blade Compact Vehicle Plow is engineered for sidewalks, pathways, and hard-to-reach areas, delivering BOSS-grade performance in a compact, agile package. Designed for full-size UTVs, it tackles tight spaces and rough terrain with ease, making winter maintenance faster and more efficient. Unlike traditional chain and pulley setups, the BOSS hydraulic system eliminates winches, chains, and pulleys—reducing maintenance and corrosion while ensuring reliable operation in any condition. Constructed from high-performance Polyurethane with ultraviolet stabilizers, the plow retains its sleek, vibrant appearance season after season. It combines the toughness of steel with the smooth performance of stainless steel. Equipped with a full moldboard trip design, the 6' Poly Straight Blade protects your equipment by allowing the entire blade to trip forward when encountering obstacles. This system absorbs impact, minimizes damage, and ensures you can confidently move through any storm
