Price: $3,695.00

Description

The Future FT-M1300 Stand-On Concrete Dump Buggy is a gas-powered mini wheel dump truck that carries up to 1,760 lb of concrete, gravel, dirt or mulch across a job site, then tips it out with a hydraulic dump. You ride on the fold-down rear platform and steer with the handlebar, so one person moves loads that would take a dozen wheelbarrow trips.
It runs on a 13.5 HP, 420cc single-cylinder OHV gas engine with key start. The poly dump box holds 594 liters (about 21 cubic feet), and dual front tires spread the load on soft ground. A battery shut-off switch, hydraulic control levers and a tool kit come with it.

Specs are from Future's parameter sheet on the machine: 480 kg (about 1,058 lb) net weight, 2360 x 1250 x 1400 mm (about 93" x 49" x 55") with the platform down, cargo box 1400 x 800 x 600 mm (about 55" x 31" x 24"), travel speed 3.2 km/h (about 2 mph), and a 26 degree climbing rating.
