Our DWB dump trailer brings 8" monoframe I-beam construction into the fold making the unit 2" shorter than our standard DTB. Built with the same rugged user in mind as our DTB model, the DWB comes in standard configurations only, but should have all the options to satisfy the needs of any serious dump user. The models include a beefy 8" I-beam frame, 7-gauge floors, 24" 10 gauge sides with 7 machined breaks that will not bend, bow, or buckle even under the most demanding conditions. A supersized locking front toolbox with divider ensures ample storage that will not interfere with your pump or battery. The front is capped off with a reinforced 2 5/16" coupler and standard 10k jack. A three way gate will ensure maximum flexibility for transport and dumping while the standard tarp will make sure you loads make it to their destination. D-rings, Y-hooks, and stake pockets are also thrown in for multiple tie-down options. This model also come equipped with slide in ramps, Nev-R-Adjust brake axles, radial tires, and a 5 amp wall charger. 516 cylinder scissor hoist give you maximum lift power when paired with a hydraulic remote operated pump. All lights are sealed lifetime LEDs and all trailers are equipped with sealed wire harnesses. These units are also backed by our industry-best IronClad warranty which covers every unit with three year structural, two year component warranty and two years free roadside assistance. So grab a bull by the horns and hook up to a DWB today.
