Description

14TI

Super-Duty I-Beam Tilt Trailer

The Big Tex 14TI I-Beam Tilt Trailer is the industry standard for operators who need a grit-tested, ramp-free solution for hauling low-clearance gear. Built on a massive 8-inch I-beam frame forged for heavy hauls, this tilt trailer features a hydraulic deck with a 12-degree angle and a diamond plate knife edge to let scissor lifts and skid steers glide on without a fight. The EZ Pedal locking mechanism keeps the tilt deck rock-solid for the long haul, while integrated fork pockets and a mega-sized lockable toolbox keep your deck clear and your gear secure. When the job is demanding and the equipment is heavy, the 14TI is the undisputed workhorse your fleet can count on.

I-Beam Frame

This structural design reduces flex and increases stability when hauling equipment or vehicles. Built to handle demanding loads, the I-beam frame delivers dependable performance and long-term reliability on the job site or the road.

Fork Pockets

Built-in fork pockets make it easy to stow forks when needed. This convenient feature simplifies trailer handling in yards, warehouses, and job sites, helping improve efficiency while reducing the need for additional lifting equipment.

Tilting Deck

The Big Tex 14TI features a gravity tilt deck with a hydraulic dampening system that ensures smooth, controlled deck movement. Paired with the EZ Pedal Latch and control valve, operators can easily release and control the tilt deck with a simple foot pedal.

Large Toolbox

A full-width toolbox that provides secure, convenient storage for essential items like the spare tire, chains, binders, band other hauling gear. This enclosed storage helps keep equipment organized and protected while freeing up valuable deck space for cargo.
