The future of lifting technology handles loads with ease, and the cylinder is up front to be out of the way during use and easy for maintenance.

5-STAGE FRONT-MOUNT TELESCOPIC

With the new cylinder technology, combined with the 45° bed angle and front design, the DT gets your aggregate out quicker and more efficiently.

IMPROVED DUMP ANGLE

The next generation of PJ dump bodies is capped off by a new rail design that provides strength (2x) than a traditional top rail.

MONSTER RAILS

For applications that need to haul additional volume, the 4' side version hauls up to 14 yd^3 of landscape or construction materials.
