STANDARD EQUIPMENT

2 -- LED recessed tail, brake and backup lights mounted in headache rack

CM's lights are brighter, and use less power than conventional incandescent lights, so that your stops, turns, tag lights and more will be easily seen and recognized.

Angled aluminum fuel fill

Provides a shiner and better-looking feature to your work truck, as well as a no-corrosion zone throughout your in-and-out hauls.

4" structural steel channel frame rails

Our 4" structural channel frame rails are stronger, more durable, and prevent any rusting from the interior of the tube.

3" steel roll-formed 3/16" channel cross

These are the toughest, most durable subframe on work trucks.

LED DOT required lighting (clearance and marker lights)

When you're backing up, turning, or hitting the brakes along the road, our LED lights will make your truck bed stand out more and brighter! Our LED lights also use less power than conventional incandescent lights.

24,000 lb.-rated B&W bumper pull hitch

CM's independently rated bumper pull hitch gives you best-in-class towing capacity, which is integrated into the entire frame.

Modular Sealed Wiring Harness

Our modular sealed wiring harnesses are designed to reduce corrosion, pulling apart, and deterioration, meaning they will withstand whatever light or harsh conditions they're placed under.

7-way round and 5-way flat electrical plug standard on rear tailboard

This standard feature allows you to hook onto any trailer and provide quality results.

30,000 lb.-rated B&W gooseneck hitch with 7-way electrical plug

This is a best-in-class, independently tested gooseneck hitch that will remain durable throughout your hauls, no matter what they may be. It also contains a 7-way electrical plug to give you ample choices for your power-driven needs.

Extruded aluminum floor

Stronger and more durable aluminum floors that win out against the competition.

3/8" rub rails and stake pockets

These features secure your straps and give you multiple tie-down points throughout your hauling jobs.

4" steel channel frame rails

Our structural 4" channel frame rails are stronger, more durable, and prevent any rusting from the interior of the tube.

Integrated tube headache rack

Our headache racks are designed with the best and strongest materials to keep you safe when the unexpected happens.
