Description

The BEAST Tilt Trailer

Built for the most demanding jobs, The BEAST Tilt Trailers from CAM Superline® deliver superior performance, strength, and versatility. Whether you choose a full deck or split deck configuration, these heavy duty equipment trailers are engineered for rugged reliability, safe loading, and long-term durability.

Key Benefits

I-Beam Frame and Tongue – Unmatched Structural Strength

The steel beam frame and tongue offer the durability and support required for heavy-duty equipment transport.Torsion Suspension – Smoother, More Stable Towing

Standard on 22K models, independent torsion suspension absorbs shock and reduces trailer bounce, delivering a smooth ride under heavy loads.Heavy-Duty Steel Bulkhead – Built-In Front-End Protection

The reinforced bulkhead shields your cargo and adds rigidity to the trailer’s front structure.Full-Size Integrated Steel Toolbox with Light – Secure, Illuminated Storage

A spacious, lockable steel box with an LED light keeps tools and gear accessible and protected day or night.Slip-Resistant Deck Access Step – Safe, Easy Deck Entry

Textured step surface ensures sure footing when stepping onto the deck, even in wet conditions.Banjo Tie-Downs – Flexible and Rugged Cargo Securement.

Durable eye-style tie-downs provide versatile anchor points to secure all types of equipment.

Why Choose a New The BEAST Tilt Trailer?

Overview

The BEAST Tilt Trailers are CAM Superline®’s premier solution for hauling heavy equipment with ease. Built on a foundation of I-Beam mainframes and tongues, these tilt trailers provide structural integrity you can count on. Designed with functionality in mind, they feature torsion axles for smoother towing and a hydraulic cushion cylinder system for controlled tilting and safe loading. Whether you prefer a full-deck or split-deck configuration, both options meet the high expectations of contractors, haulers, and equipment operators alike.Available Models

The BEAST is available in both full deck and split deck configurations in 15.4K, 17.6K, and 22K GVWR. Full deck models come in lengths of 18’, 20’, and 22’, while split deck configurations include 16’+4’, 16’+6’, and 18’+4’. All trailers include oil bath hubs, diamond plate fenders, and a 12K 2-speed set-back jack for easy hookup and leveling. Deck heights of 25” and load angles between 13° and 14° ensure easy equipment access.Standard Features

Every model includes a heavy-duty steel bulkhead, pressure-treated pine decking, sealed wiring harness, LED rubber-mounted lighting, slip-resistant deck step, and a full-size lockable steel toolbox with an integrated LED light. Banjo tie-downs and D-rings (four on full deck, six on split deck) provide ample securement options. The finish is completed with premium industrial-grade polymer coatings to withstand the elements.Options

Tailor The BEAST to your needs with a range of upgrade options including a gooseneck hitch, 7-gauge diamond plate fenders for added toughness, a solar charger with protective guard, and a 12K winch in a flip-up box. Add oak decking for enhanced surface durability, a pallet fork carrier for added utility, or chain spools and a rub rail for expanded tie-down capacity. Choose power tilt functionality with 110V charging to streamline your loading process even further.
