Price: $6,545.00

Description

This is the package price and INCLUDES our professional installation on most applications
Complete Truck plow Package w/Nighthawk Halogen Headlights
Defend your driveway from the deepest drifts with the WESTERNRegistered DEFENDERTrademark compact snow plow. Ideal for midsized pickups and SUVs, this plow knows a thing or two about how to get things done--and done right.
PLOW BLADE CONSTRUCTION
The reliable, 16-gauge, powder coated steel moldboard is 23 1/2 " tall and available in **6' 8"** and 7' 2" widths for rugged snow plowing performance without the extra weight. The DEFENDERTrademark snow plow comes standard with a high-carbon steel cutting edge that reduces wear and extends the life of the blade.
STRUCTURAL REINFORCEMENT

Six vertical ribs provide unmatched structural reinforcement, delivering exceptional torsional strength and rigidity to eliminate blade twisting. The high-strength steel base channel provides extra support along the bottom of the plow blade. The 1" diameter pivot bushing secures the plow in place, ensuring proper alignment and reducing stress on the overall plow assembly.

RELIABLE HYDRAULICS

We manufacture our own hydraulic components to ensure the highest standards of quality and reliability, so that you get a hydraulics system that's not only fast and responsive, but that's built to last season after season. Fully enclosed components are protected from the elements. Hydraulic Scrape Lock holds the blade down for more efficient scraping and clean back dragging.

EASY ON / EASY OFF

A simple mechanical attaching system makes hooking up and removing your plow quick and easy. Attaching the DEFENDER snow plow can be done quickly and easily by one person and without tools. Simply drive into the attaching arms on the plow, then connect the two spring-loaded pins. Remove the stand, and finally, connect the electrical plugs. Detaching the plow is just as easy. The receivers are detachable to maintain ground clearance.

GROUND CLEARANCE

When the plow is not in use, quickly maximize vehicle ground clearance with the removable receiver brackets. No tools required.

TRIP PROTECTION

The two-spring trip blade protects your snow plow and truck when striking hidden obstacles. Elastomeric bumpers reduce jarring and soften the blade return when tripping occurs, to extend the life of your truck and plow.
