INFORMATION ON POLY COR:

PolyCor™ AP is a specially formulated siding material designed to meet the rigorous demands for trailer siding.

Traditional aluminum siding is greatly affected by heat and cold, leading to an unsightly effect known as “oil canning.”

PolyCor AP is structurally designed to prevent oil canning even in extreme temperatures, and has a polyester paint that can be easily cleaned with standard household cleaning products. PolyCor AP makes for a cooler, brighter, quieter and better looking trailer.

FEATURES & BENEFITS

- Lightweight
- Easily Cleaned
- Reduces Noise
- Completely Waterproof
- Excellent Structural Stability
- Excellent Chemical Resistance

POLYCOR AP VS ALUMINUM

The average weight per sheet of PolyCor AP is 0.58 lbs/ft².

PolyCor AP is slightly lighter than .040” aluminum, and 25% lighter than .050” aluminum.
