Description

HS Series Side Dump Trailer

- TARP KIT INSTALLED

The Midsota HS Series Side Dump Trailer is built for strength, durability, and high-performance hauling. Available in 16? to 24? lengths with GVWRs from 15,400 to 23,100 lbs., it features a scissor lift hoist system, self-adjusting electric brakes, and a low-profile design for easy loading. The 21? and 23? models include a tilt deck for efficient unloading. Customization options include an 8K axle upgrade, roll tarp, wireless remote, landscape gate, aluminum wheels, and a hydraulic tongue jack.
You need a trailer that can handle the demands of your work and adventures. Midsota trailers are built for long-term performance, giving you the confidence to haul whatever, wherever.
Key Benefits
Side Dump Box with Bedside Removable Wall
The side dump box with a removable bedside wall provides versatile dumping options and easy access for efficient material handling.

Flatbed or Tilt Deck Option

Choose between a flatbed or tilt deck option to match your specific loading and unloading needs, enhancing flexibility and convenience.

Midsota Exclusive Indicator Module

The Midsota exclusive indicator module ensures precise control and monitoring of your trailer's functionality for improved efficiency and safety.

Poly Toolbox

The durable poly toolbox offers secure storage for tools and equipment, keeping your gear safe and organized on the job site.

Why Choose a HS Series Side Dump Trailer?

Overview

The Midsota HS Series Side Dump Trailer is engineered for durability, strength, and high-performance hauling. Designed for contractors, landscapers, and homeowners, this heavy-duty utility trailer is built to tackle large loads with ease. Available in 16' to 24' lengths, it offers the versatility needed for a variety of applications. With a reinforced steel frame and tilt deck models available, the HS Series ensures effortless loading and unloading, making it an essential tool for any demanding job.

Standard Features

The HS Series Side Dump Trailer is built for longevity with a heavy-duty steel frame and a scissor lift hoist system, ensuring smooth and controlled dumping. Self-adjusting electric brakes provide increased safety and stability, while the sealed wiring harness protects the trailer’s electrical components from weather and road debris.

A poly toolbox offers secure, weather-resistant storage for tools and equipment, keeping everything organized on the job site. The low-profile design enhances ease of loading, while the side dump box with removable bedside walls provides added flexibility for material handling, making it ideal for tight job sites and varied hauling needs.

Available Models

The HS Series Side Dump Trailer is available in 16', 18', 21', 22', 23', and 24' lengths. The 21' and 23' models feature a tilt deck, allowing for smooth and efficient unloading of heavier or bulkier materials. GVWR options range from 15,400 lbs. to 23,100 lbs., ensuring the HS Series is capable of handling both moderate and extreme hauling demands. Whether you need a smaller, more compact model for regular material transport or a larger, heavy-duty dump trailer for intensive projects, this series provides the strength and durability to meet your needs.

Options

To further enhance performance and convenience, the HS Series Side Dump Trailer offers a variety of customization options. The 8K axle upgrade increases load capacity, making it ideal for heavier materials. A roll tarp can be added to keep loads secure during transport. The wireless remote control provides effortless dumping operation, allowing for greater efficiency on the job. A landscape gate enhances accessibility for loading and unloading equipment, while aluminum wheels improve durability while reducing weight. For added convenience, a hydraulic tongue jack simplifies trailer leveling and hitching, making setup and transport easier than ever.
