Description

Tilt Trailer

CAM Superline® Tilt Trailers offer an ideal solution for equipment transport, delivering fast loading, rugged performance, and versatile configurations. These tilt bed trailers are engineered for contractors and pros who need reliable equipment trailers with smart, user-friendly features.

Key Benefits

Adjustable Coupler and Drop Leg Jack – Ensure Secure, Flexible Connections

An adjustable 2-5/16" ball coupler and bolt-on drop leg jack simplify hookup on any job site.

Slipper Spring Suspension – Built for Heavy-Duty Performance

This reliable suspension system offers smooth, consistent towing even under heavy loads.

Pressure-Treated Pine Deck – Long-Lasting, Dependable Flooring

Every tilt trailer features a pressure-treated pine deck to handle years of tough service.

Banjo Tie-Downs – Simple, Strong, and Secure

Banjo eye tie-downs make it easy to anchor and stabilize your load with confidence.

Why Choose a New Tilt Trailer?

Overview

CAM Superline® Tilt Trailers are designed to move equipment efficiently and safely with a full-tilt bed or split-tilt platform. Whether you're hauling compact machinery, construction tools, or utility vehicles, these tilt trailers simplify loading with a smooth hydraulic tilt system and durable, low-angle deck design. From landscapers to contractors, anyone needing rugged equipment trailers will find a reliable solution in this lineup.

Available Models

Four configurations are available to match your hauling needs: single axle tilt, tandem axle tilt, full deck tilt, and split deck tilt. Single axle models are ideal for lighter loads and tight spaces, while tandem and split deck models accommodate heavier machinery with increased stability. Full deck tilts provide a continuous platform for larger or wider equipment.

Standard Features

All CAM Superline® tilt bed trailers are built tough, with features like a fully sealed wiring harness, LED lighting, and diamond plate fenders. The frame and crossmember construction use structural channel steel for long-term durability. Every trailer includes a spare tire mount, 7-way SAE plug, safety chains, and an adjustable hydraulic cushion cylinder for controlled tilting. With standard D-rings and stake pockets, cargo can be secured in multiple ways.

Options

Outfit your tilt trailer with a variety of options to fit specific jobs. Choose gooseneck configurations for 11K and 15.4K models to boost capacity and stability. Add more D-rings for additional tie-down points or upgrade to oak or diamond plate steel decking for extra toughness. Hydraulic jacks, pintle hooks, and winch mounts are also available for enhanced utility.
