Sales Price: \$26,500.00

Description

The FMAX210 tandem dual wheel gooseneck trailer combines a lighter weight with a stronger frame, ensuring superior performance. Now available in the Pacesetter Edition, this gooseneck trailer is designed for those who demand the best. The Pacesetter version of the FMAX210 includes options for Hydraulic Dovetail and Max Ramps loading, enhancing its functionality and convenience. Experience unparalleled strength and reliability with the FMAX210.

Upgrade to Aluminum Wheels

Weight Reduction: Significantly lighter than steel wheels, which can result in improved fuel efficiency and an easier hauling experience.

Heat Dissipation: Aluminum is a better conductor of heat than steel, allowing for improved heat dissipation. This can help prevent overheating during long trips or heavy loads.

Corrosion Resistance: Aluminum is naturally resistant to corrosion, making it an ideal choice for trailers frequently exposed to moisture and salt, leading to longer-lasting wheels and enhanced durability.

New, Lighter Neck

The Fleetneck 2.0 neck web is stronger and lighter with the new 10-gauge Grade 80 material resulting in a 65-pound weight reduction.

Grade 100 Beams

Grade 100 main frame beams with a 10-gauge thickness have doubled the yield strength of the Fleetneck 1.0.

New Spare Mount Location

The new spare tire mount location with the easy-to-handle winch that raises and lowers the spare is now located under the trailer deck, guaranteeing it is out of your way until you need it.

Chain Tray/Winch Mount

Storing your chains is easy with the standard chain tray with a winch mount combination and has the option to add a bolt-on winch box.
