Description

The PJ DE dump trailer with a 24,000 lb GVWR and 36” tall sides is built for folks who need a serious work trailer that can handle big loads without backing down. Whether you’re hauling gravel, demolition debris, brush, or heavy material around the farm or jobsite, this trailer’s got the strength and capacity to get it done without making extra trips. The 36” tall sides give you plenty of room for bulky loads while keeping everything contained, and the heavy-duty frame and suspension are built to stand up to rough roads and everyday hard use. Its strong hydraulic lift system gives you dependable dumping power, even when the bed’s loaded down heavy, and the trailer pulls smooth and steady behind the truck for its size. Built tough and made for real work, the PJ DE is the kind of dump trailer that earns its keep fast and keeps showing up ready for the next load.
