## Description

The Diamond C HXD210 Max Width Hydraulic Tilt Equipment Trailer is a premium heavy-duty tilt trailer engineered for maximum capacity, stability, and professional-grade equipment hauling. Built on a 24’ x 102” max-width engineered beam frame, this trailer features an 18’ hydraulically dampened gravity tilt bed with a 6’ stationary deck, allowing smooth, ramp-free loading of large skid steers, tractors, and heavy machinery.

Designed for serious commercial use, the HXD210 rides on tandem 10K drop axles with electric oil-bath drum brakes and 10K torsion suspension, delivering superior strength, smooth towing performance, and long-lasting durability under heavy loads. The super single ST235/75R17.5 18-ply steel tires further enhance load stability and road confidence for demanding transport conditions.

This model includes a 25K Demco EZ-Latch flat-mount coupler for maximum towing strength, a heavy-duty 15K Simol 2-speed drop-leg jack, and a reinforced V-tongue storage box with lid for added utility. The max-wide package with 10-gauge heavy-duty drive-over fenders and frame extension increases versatility for oversized equipment, while rub rails with stake pockets and pipe spools provide flexible tie-down options.

Finished in carbon metallic gray with a treated wood floor and all-LED lighting, the HXD210 blends extreme durability with a clean, professional appearance—built for operators who need maximum strength, width, and reliability in a hydraulic tilt trailer.
