Price: $4,495.00

Description

The PJ U7 12’ single axle utility trailer with 22” solid steel sides and an upgraded 5,200 lb axle with brakes is a tough little trailer built for folks who need something small but ready to handle more than the average load. Those 22” steel sides are great for keeping firewood, tools, feed, or debris contained without worrying about things bouncing out, and they’re built to take some abuse. The upgraded 5,200 lb axle gives you extra hauling capacity, and the added brakes make a big difference when it comes to stopping safely, especially with a heavier load. It’s easy to maneuver, pulls nice and steady behind the truck, and is just as at home around the farm as it is on a jobsite. Built solid and made for real work, this is the kind of utility trailer that punches above its weight and earns its keep in a hurry.
