The Diamond C FMAX212 gooseneck with hydraulic dovetail and all-aluminum flooring is built for folks who want a trailer that’s loaded with premium features and ready for serious work. With Diamond C’s engineered beam frame and heavy-duty construction, it’s designed to handle tractors, skid steers, hay equipment, and commercial loads without breaking a sweat. The hydraulic dovetail makes loading quick and easy with the push of a button, giving you a smooth transition onto the deck and saving time throughout the day. One of the standout features is the electric-over-hydraulic braking system, which delivers stronger, smoother, and more responsive braking than traditional electric brakes. Whether you're hauling a light load or running near capacity, the braking performance is more consistent and gives you greater confidence when stopping, especially in traffic, on hills, or during emergency situations. The all-aluminum floor is another premium upgrade, offering excellent durability while eliminating concerns about rotting deck boards and reducing long-term maintenance. This is the kind of trailer built for folks who put thousands of miles and countless hours on their equipment and want premium performance every step of the way.
