Price: $16,880.00

Description

Designed into the Stallion horse trailer, you will appreciate the beauty and durability of the all-aluminum exterior and aluminum-lined interior. Underneath that beautiful exterior is a strong all-steel framework designed for years of use. The best of both worlds is in the Stallion horse trailer, the beauty and durability of aluminum and the strength of steel.
In order to ease travel and to yield more interior space, an aerodynamic Vee-nose is standard equipment on all Stallion horse trailers.

- Available in Six Colors

For an easy ride, the Stallion horse trailer comes standard with rubber ride torsion axles and radial tires.
When your horse steps inside, he will appreciate the extruded rubber flooring system in the Stallion horse trailer. Extruded rubber flooring is the premier flooring system for horse trailers today. Unlike wood, Extruded rubber flooring will not rot or decay. It comes with a 20-year warranty from its manufacturer. Extruded rubber flooring gives a cushioned ride to your horse, while being rigid enough that he will not slide. Extruded rubber flooring does not wad up as rubber pads can do. No pads are necessary with this flooring system. Cleaning the floor is as easy as operating a water hose.
As you work your way around in the stall area you will appreciate the 4 high reinforced wall pads, and the padded divider gates. Manger feed bags and tie hooks will ease your travel plans.
Drop down feed windows are standard equipment and they do include separate bar guards to keep your horses head inside the trailer as you travel. All windows are tinted to minimize glare to your horse.
Ventilation is very important and the Stallion horse trailer is designed to maximize airflow. All windows slide to allow for maximum airflow. Two-way roof vents are standard for each horse stall.
