LED LIGHTS
ENCLOSED WIRING HARNESS

12000# SPRING LOADED JACK

PRIMED WITH RUST INHIBITIVE PRIMER

TOP COAT OF ACRYLIC ENAMEL FOR LONG PAINT LIFE

Simply load the bales onto the trailer with a front end loader or a bale spear. Drive to the desired destination. Then bring the unloading lever to it's unload position and easily unload all bales to the side of the trailer. As you bring the lever to the unload position it unlocks the double latch system that has kept your load in place. A lift on the lever to start the unloading is all it takes. After the bales have rolled off bring the cradle to the load position and then swing the lever back into lock position. You're ready for the next load!

These trailers are manufactured by: Brad's Welding Shop LLC
