Price: \$10,495.00

MSRP: \$11,173.00

Description

The Commercial Heavyweight: 2026 Sure-Trac 7x20 16K HD Equipment Trailer

While our 14K HD model is the undisputed "Standard of the Industry" and the perfect fit for 90% of equipment hauling needs, some operations demand a specialized level of over-engineering. The 2026 Sure-Trac 16K HD Equipment Trailer is built for the high-utilization fleet or the operator moving the heaviest class of mini-excavators and full-sized skid steers. This is a structural powerhouse, providing a 12,280 lb. payload capacity and a set of commercial upgrades designed specifically for long-distance hauling and maximum durability.

Strategic Upgrades: What the 16K Brings to the Table

The jump to the 16K isn't just about a higher number on the VIN tag; it's about a massive increase in the "running gear" and structural reinforcement:

- **8K Axles & Oil Bath Hubs:** Stepping up from 7K to (2) 8,000 lb. Slipper Spring Axles provides a significant buffer for heavy loads. More importantly, these are equipped with Oil Bath Hubs, the gold standard for commercial trailers. They offer superior lubrication and heat dissipation for long highway hauls compared to traditional grease hubs.

- **17.5" 18-PLY Commercial Tires:** This is one of the most significant upgrades. Instead of 16" tires, the 16K runs on 215/75R17.5J 18-PLY tires. These low-profile, high-pressure tires are designed for extreme weight and commercial abuse, offering a much higher safety margin and significantly longer tread life.
 - **8" Wrapped Channel Tongue:** To support the increased GVWR, the tongue is upgraded to 8" Steel Channel (compared to 6" on the 14K). This adds even more rigidity to the front of the trailer, ensuring a zero-flex connection to your tow vehicle under maximum load.
 - **Pintle Ring Coupler:** Standard on this model is an Adjustable 4-Bolt Pintle Ring. This is the preferred connection for heavy-duty dump trucks and commercial vehicles, providing a secure, high-capacity link for extreme-duty environments.
 - **Heavy-Duty Tie Downs:** The 16K is spec'd with (4) 5/8" D-Rings (upgraded from 1/2"), ensuring your heaviest machinery is anchored by the strongest hardware available.
-

Specifications & Commercial Build

Feature 16K Model Specification

GVWR 16,000 lbs

Payload Capacity 12,280 lbs

Axles (2) 8,000 lb. Slipper Spring w/ Oil Bath Hubs

Tires 215/75R17.5J 18-PLY (Commercial Grade)

Tongue 8" Steel Channel (Fully Wrapped)

Coupler Adjustable 4-Bolt Pintle Ring

D-Rings (4) 5/8" Heavy Duty

14K vs. 16K: Choosing Your Tool

At Roxbury Trailers, we sell the 14K model 10-to-1 because it is an incredible, versatile trailer that handles the vast majority of equipment perfectly. However, the 16K is the right choice if:

1. You are a dedicated commercial hauler: If your trailer is on the road 5–6 days a week, the Oil Bath hubs and 18-PLY tires will pay for themselves in reduced maintenance.
 2. You are at the limit: If your machine and attachments consistently put you right at 10,000 lbs, the 16K gives you the extra headroom and 8" frame strength to operate with total peace of mind.
 3. You tow with a Pintle hitch: This trailer is factory-configured for commercial truck fleets.
