4" Tubular Cross Beams on 5” Frame Trailers at 3,500 lb. or more
CERTIFICATIONS: NATM (National Assoc of Trailer Manufacturers) COUNTRY OF MANUFACTURE: Proudly built in Cincinnati, OH USA
BETTER QUALITY:
Our Black Rhino Aluminum Trailers are designed with durability and long-term use in mind. Each of our trailers are constructed with 6005 grade tubular aluminum by expert welders using the highest grade welding wire available. Most of our trailers utilize a "Wishbone" style tongue/A-Frame design for strength and durability. You won't find structural components and cross-members built from angle or channel like many other manufacturers. Plus, the components (including axles, wheels, tires, and electrical) on our Black Rhino Aluminum Trailers are all second to none. It's this combination that will give you confidence and assurance that the trailer will last for years to come.
Our "Full Contact" Design
As mentioned above, we use tubular aluminum for all structural components of our trailers, which adds strength to the trailer and provides 4 welds at joints versus 2 or 3 with angle or channel. So, when you take closer inspection of our trailers, you'll be happy to notice our "Full Contact" manufacturing and design. Simply put: We weld everything! Our expert welding technicians take their time to ensure that each and every point of contact is welded with precision. These additional welds create a stronger, more durable aluminum trailer that can easily hold up to the constant abuse that most trailers endure, and we think the additional peace of mind is well worth it.
Easy Loading and Unloading
All of our Black Rhino Aluminum Trailers are designed with easy loading and unloading in mind. Our heavy-duty fold-down ramps makes loading and unloading cargo or equipment a breeze, while our high quality torsion or leaf spring axle options from Lippert, Dexter, or Terran ensure that you have a smooth ride once loaded and ready to go. Plus, all our trailers come standard with 2" or 2-5/16" sealed coupler, so you can tow your trailer with your vehicle for peace of mind that it is attached securely.
