Full Description
The 6000XL Series Truck Body is engineered for maximum durability and performance, ideal for heavy-duty applications. Made with a 3/16? aluminum deck plate, this truck body offers a combination of strength and lightweight design. The welded headache rack provides extra protection for the cab, while the double 4? steel channel frame ensures a solid, long-lasting structure. It features a 30,000 lbs. rated B & W Turnoverball Gooseneck Hitch welded into the frame and a 20,000 lbs. rated weld-in rear receiver hitch with 2? or 2 1/2? options, making it perfect for towing heavy loads. The truck body is equipped with a 7-way round electrical plug and sealed wiring harness for reliable electrical connections. Stake pockets and a rub rail add versatility for securing cargo, while the heavy-wall C-type aluminum channel around the perimeter enhances durability. Steps by the rear receiver hitch allow easy access. Available in multiple sizes including 84? and 97? widths,
and lengths from 84? to 144?, the 6000XL Series can be customized to fit
your specific truck and workload needs.
Sample Pricing / in stock 87" wide by 84" long = $
Sample Pricing / in stock 87" wide by 102" long = $
