The Aluma 8016TA-EL-R-TG-RTD is a 16 ft x 80 in all-aluminum tandem-axle utility trailer built for hauling equipment, ATVs, UTVs, compact tractors, and other heavy loads. With an 8,500 lb GVWR, dual 4,400 lb rubber torsion axles, and electric brakes, it delivers excellent towing stability, durability, and safety while remaining lightweight and corrosion-resistant thanks to its aluminum construction.

Key features include an extruded aluminum floor, removable aluminum fenders, 5-foot aluminum loading ramps with under-deck storage, an aluminum tailgate, recessed tie rings, rear stabilizer jacks, LED lighting, and aluminum wheels. The trailer's retaining rails and multiple tie-down points help secure cargo during transport, making it ideal for both commercial and recreational use.

Designed for serious hauling, the 8016TA-EL-R-TG-RTD combines high payload capability, low-maintenance aluminum construction, and user-friendly loading features, making it a dependable choice for contractors, landscapers, and equipment owners.
