Description

This 2026 Pace American 7x16 V-nose enclosed cargo trailer is built for buyers who need to haul and store equipment, tools, or cargo safely out of the weather. A 7 ft interior height gives most adults room to stand and move around inside comfortably, and the rear ramp door provides easy loading for wheeled equipment, motorcycles, or UTVs. The steel frame is reinforced with 16 in on-center cross members for a solid, flex-resistant floor structure, and a 3/4 in floor adds further durability under heavy or repeated loads. A one-piece roof eliminates seams that can lead to leaks over time, and .080 polycore sides give the exterior a smooth, durable finish that's easy to clean. Aluminum wheels add a finished look while resisting corrosion better than steel wheels. Security is covered with an RV-style door lock and cam bar hasp, and a rear spoiler with integrated LED lighting improves visibility while adding a finished, aerodynamic look. The setback tongue jack makes hitching easier, and a 2 5/16 in ball coupler with 7-pin plug covers hookup to most tow vehicles equipped for larger trailers. Rated at a 7,000 lb GVWR with a 4,520 lb payload capacity, this trailer has the capacity for contractor equipment, powersports vehicles, or a full load of cargo. Finished in silver — contact us for current pricing.
