Description

Pace American 8.5' x 24' Pursuit Race Trailer

The Pace American Pursuit 8.5' x 24' Flat Top Bullnose Race Trailer is a premium enclosed trailer engineered for racers, motorsports teams, car enthusiasts, and commercial users who demand durability, functionality, and a professional appearance. With a 10,000 lb GVWR, spread torsion axles, and a fully finished interior, this trailer is designed to transport vehicles, equipment, and tools safely and comfortably.

Built on a rugged 6" x 2" steel tube frame with steel tube wall posts and roof bows spaced on 16" centers, the Pursuit delivers exceptional structural strength. The 48" beavertail, 16" ramp extension, and 400 Series rear ramp door with assist make loading low-clearance race cars and vehicles easy and efficient.

The exterior features a striking white and black composite finish, screwless sidewalls, aluminum trim, BATTLECOAT polyurea protection, and a translucent Brawn LightLID roof that helps brighten the interior during daylight hours. Additional exterior upgrades include integrated backup lights, LED loading lights, aluminum wheels, and a maximum-extension tongue for improved towing versatility.

Inside, the trailer offers a professional-grade setup with 84" interior height, white vinyl wall liner, overhead and base cabinetry, recessed D-rings, rubber coin flooring throughout the trailer and ramp, and both 12V and 110V lighting systems. A complete 30-amp electrical package with service panel, power cord, and interior outlets provides convenient shore power capability, while HVAC bracing and wiring allow for future climate-control installation.
