Price: $11,790.00

Description

The Little Blue is the perfect choice for sawyers seeking a high-end portable sawmill experience without breaking the bank. Packed with essential features and customizable options, this model delivers exceptional value in quality, performance, mobility and durability.
This Canadian-made sawmill's 30-inch diameter capacity makes it ideal for turning logs into boards, planks, and beams. The Little Blue is great for a variety of applications as it is fully customizable to suit your needs. From frame sizes to engine's power, you can build your very own Little Blue choosing between a variety of options. If mobility is important for you, our road trailer package has you covered. It includes a single or optional twin axle, high-speed wheels and tires, wheel fenders, brake lights and turn signals and an illuminated license plate bracket.

The Little Blue includes many features of other Vallee portable sawmills models. It comes with electric adjustable height, 2 levelers, 2 log clamps and a heavy-duty tubular steel welded frame, making it very durable. This sawmill is also equipped with a powerful Honda engine, providing reliable performance day after day.

Every Vallee portable sawmill is designed to be both efficient and easy to use. Our portable sawmills are incredibly easy to set up, transport and use. Our Vallee's exclusive One-Step-Go technology allows to activate the engine, blade and lubricant as well as brake removal in a single motion. They are designed to make the process of sawing logs into lumber a simple and easy task. All of our Vallee portable sawmills are delivered pre-assembled and ready to use right out of the factory.
