Price: \$14,895.00

MSRP: \$15,696.00

Description

Extreme Capability: 2026 Sure-Trac 8.5x25 (20+5) 22.5K HD Low-Profile Deckover

When your livelihood depends on moving heavy excavators, massive pavers, loaders, or maxed-out loads of building materials, you can't rely on standard equipment. The Sure-Trac 22.5K Heavy Duty Low-Profile Deckover is an absolute powerhouse engineered specifically to bridge the gap between medium-duty haulers and semi-trailers.

With a massive 16,960 lb. payload capacity and a rock-solid 12-inch I-beam frame, this rig handles extreme weight without breaking a sweat. This is pure commercial iron. No shortcuts, no fluff, and zero junk.

Key Capacities & Dimensions

- GVWR: 22,500 lbs
- Curb Weight: 5,540 lbs
- Net Payload Capacity: 16,960 lbs
- Total Length: 25' (20' Flat Deck + 5' Self-Cleaning Beavertail)
- Deck Width: 8.5' (102")
- Deck Height: Super Low-Profile 32"

Technical Specifications

Main Frame & Tongue 12" Heavy-Flange, 14 lb/ft Industrial I-Beam

Side Rails 5" Steel Channel

Crossmembers 3" Steel Channel with Cross-Trac™ Undercarriage Bracing

Axles (2) 10,000 lb. Slipper Spring Brake Axles

Hubs Heavy-Duty Oil Bath Hubs

Coupler Adjustable 4-Bolt Pintle Ring

Jacks 12K Drop-Leg Jack

Ramps Universal Full-Width Dual Fold-Over Ramps with Double Spring Assist

Decking 2" Pressure-Treated Pine (Steel Tread Plate Over Wheels)

Tie-Downs (8) 5/8" D-Rings, Stake Pockets, Chain Spools, and Rub Rail

Why This 22.5K Beats the Rest

1. Pierced Frame Engineering: Lowered Center of Gravity

Traditional heavy deckovers ride too high, creating sketchy loading angles and terrifying crosswind sway on the highway. Sure-Trac's pierced I-beam frame construction allows the crossmembers to pass directly through the 12" main rails. This drops your deck height to a low 32 inches, giving your heavy equipment a safer, shallow load angle and a rock-solid, stable track behind your truck.

2. Cross-Trac™ Torsional Reinforcement

To eliminate the structural twisting that ruins cheap trailers when loading off-center equipment, the entire undercarriage is armored with Cross-Trac™ bracing. This high-strength framework reinforces the main I-beams, shifting the torque evenly across the heavy dual 10K axles to maximize pulling power and long-term frame life.

3. Full-Width Universal Mega-Ramps & Self-Cleaning Tail

- 5' Self-Cleaning Beavertail: The rear tail is built with open steel grating that instantly knocks caked mud and debris out of your machine's treads before it hits your wood deck.
- Full-Width Fold-Over Ramps: Equipped with a dual heavy-spring assist, these full-width ramps flip over effortlessly with one hand. They fold completely flat onto the tail, instantly giving you a flush, seamless 25-foot deck to haul long loads of pipe, structural steel, or lumber just as easily as tracked machinery.

4. Absolute Commercial-Grade Outfitting

Grounding this machine are dual 10,000 lb. slipper spring axles with low-maintenance commercial Oil Bath Hubs. For tie-downs, you aren't limited to a couple of cheap loops; you get eight 5/8" D-rings, full perimeter stake pockets, heavy rub rails, and structural chain spools. Toss in integrated side steps, a reinforced tube bulkhead, and a premium polymer powder coat finish, and you have a trailer engineered to dominate the hardest work weeks for years to come.

The Verdict

The Sure-Trac 22.5K HD Low-Profile Deckover is the ultimate tool for serious heavy-haul professionals. It's not just built to handle the heaviest loads on the road—it's built to make your

crew faster, safer, and entirely self-sufficient on the job site.
