Sales Price: \$10,799.00

Description

This 2027 PJ Trailers 24 ft I-beam frame tilt trailer is built for contractors and equipment owners who need a long, low-angle loading deck for larger machinery. The 16 ft tilting deck section makes loading skid steers, compact excavators, and other equipment straightforward, with a low approach angle that reduces strain on hydraulics and undercarriages. An I-beam frame provides exceptional strength and resistance to twisting under heavy, uneven loads, and the wood deck offers secure footing. Dual 7,000 lb axles support a 15,400 lb GVWR with a 10,900 lb payload capacity — enough for genuinely heavy equipment. A full-size tongue tool box keeps chains, binders, and tools organized and close at hand, and the adjustable coupler can be swapped to a pintle ring for buyers who need that connection type. A sealed wiring harness and LED lighting round out the electrical package, and the powder-coated finish stands up to years of job-site use. Finished in black, this PJ Trailers tilt trailer is ready for serious equipment-hauling duty.
