Description

Corn Pro 16' Bumper Pull Livestock Trailer
The Corn Pro 16' Bumper Pull Livestock Trailer is engineered for dependable livestock transportation, combining rugged construction with premium components for long-lasting performance. Measuring 16 feet in length and 6 feet 8 inches in width, this trailer features a 9,990 lb. GVWR, making it well-suited for hauling cattle, sheep, goats, and other livestock.
The trailer is built on a heavy-duty 3" x 5" x 1/4" structural angle main frame with 3" x 2" x 3/16" cross members and a durable 4" channel tongue for exceptional strength and stability. A spacious 6'6" interior height with a 6-foot roof radius provides ample headroom and improved airflow for livestock comfort.
For safe and efficient animal handling, the trailer is equipped with a center gate, while Dexter Torflex torsion axles deliver a smoother ride and reduced maintenance compared to traditional spring axles. Stopping power is provided by electric brakes on all axles, complemented by a 12-volt breakaway system with battery for added safety.
Premium towing components include a Bulldog coupler and Bulldog jack for reliable hookup and operation. The trailer also features two evenly spaced interior dome lights, rubber-mounted LED exterior lighting, and double tail lights for enhanced visibility and durability.
The treated, kiln-dried pine flooring offers a strong, dependable surface designed to withstand the demands of livestock hauling. Prior to finishing, the trailer is bead-blasted to ensure superior paint adhesion, then coated with a PPG epoxy primer and durable urethane topcoat for outstanding corrosion resistance and long-lasting appearance.
Finished in Gray, this Corn Pro livestock trailer delivers the durability, functionality, and quality craftsmanship needed for everyday agricultural use.
