Description

WESTERN FLATBED TRUCK BODY

Regardless of what you're towing or where you're going, our new Western Flatbed works for you. With both function and form, the hard-hitting combination of louvered style headboard, chamfered finishings, and sloped rear floor make for easy maneuvering, while D-rings for securing equipment ensure you outperform and outlast your competitors.

With four built-in toolboxes to accommodate all storage needs, the striking new Western Flatbed impresses both function and form. Equipped with stainless steel on fenders and running boards, this flatbed fits every truck, while tapered sides and a rear dovetail give the flatbed a unique "œl-caught-you-looking" aesthetic.
