**Description**

The Nexhaul 6x12 Bullet is a step above the standard enclosed trailer, built with upgraded materials and a cleaner finish that makes a difference both on the road and over time. It’s compact, easy to tow, and designed to handle everyday hauling without feeling like a basic unit.

Finished in .080 engineered polycore with a semi screwless exterior, this trailer offers a smooth, refined look with added durability where it matters. It holds its structure well and keeps a sharp appearance through regular use.

The 16 inch on center construction throughout gives the trailer a consistent, solid feel, while the 3/4 inch engineered floor backed by a 15 year warranty provides dependable support for cargo, equipment, or weekend use.

With drop axles, the trailer sits lower to the ground, making loading more convenient. The spring assist ramp door and 32 inch side door with flush lock allow for easy access, and the V nose adds extra usable space up front while improving towing flow.

A 3500LB EZ Lube axle paired with radial tires keeps it tracking smoothly down the road. The one piece aluminum roof and aluminum tread plate stone guard help protect against weather and road debris, keeping everything in good condition.
