Description

This 2026 ATC 28 ft ROM 450 aluminum enclosed car hauler is built as a true track-day and toy-hauler trailer, loaded with the kind of amenities that turn a race weekend into a genuine home base. A full perimeter aluminum frame keeps weight down while maintaining structural strength, and the 7 ft 6 in interior height gives you room to move around comfortably. Inside, you'll find a kitchenette with a microwave and mini fridge, a toilet, and a Happijack bed that folds out of the way when you need the floor space for your vehicle. A 5,000 lb winch with remote makes loading your car, UTV, or motorcycle simple, and 2 bogey wheels support the ramp door under load. Climate control comes from a 13,500 BTU air conditioner with heat strip, and insulated walls and ceiling help maintain that temperature efficiently. Power is covered from every angle: a 50 amp package with converter, a lithium battery, and solar charging with trickle charge keep your electronics running whether you're plugged in or off-grid, and a 32 in TV is included for downtime between track sessions. A 12V awning with LED lighting extends your living space outside, and an electric tongue jack makes hitching effortless. The black rubber coin floor and 40 in Bed Rug-lined walls protect the interior from scuffs and wear, while a rolling pack-out system and paddle latches in the rear keep gear organized and secure. Riding on torsion axles with electric brakes on both, this trailer tows confidently even fully loaded. Finished in silver, this ATC ROM 450 is ready for your next track day or extended trip.
