Description

OVERVIEW

The TM model is America's ultimate utility hauling body. Oftentimes copied, this bed is a model all its own. This bed gives users not only the great features of the brand, but also tall front boxes, shovel boxes, and rear chain boxes, all standard! Additionally, this bed comes standard with our tube steel headache racks, 1/8" steel tread plate decking, a rear tailgate, and of course, LED lighting. The interior width on this deck ranges from 48" to 52" which gives you ample room to store tools and equipment on the deck. When you are designing a real work truck, look no further than the TM model. All sides boxes are fully integrated, recessed into the body, preventing the leaking

that you see in many of the other utility beds on the market. The available sizes for this model are 8'4" length, 8'6" length, 9'4" length, and 11'4" length.

Built dependable with style unsurpassed, our TM model is outfitted with many standard features and hardware that surpass your expectations and make your productivity endless.
