COMBI SALT SPREADER DESIGN

The Hilltip IceStriker(tm) 2000-6000 AM/CM is a 12V and 24V electric sand and salt spreader for trucks. The spreader has a stainless steel auger and the modular hopper body is made of polyethylene. Components on our spreaders provides you long lasting protection against corrosion and rust. The IceStriker(tm) combi salt spreader with it's unique control system, saves you money and reduces the impact on the environment, while achieving the same results as before.

LIQUID DE-ICING SPREADER

The poly hopper salt spreader for trucks can easily be transformed into a brine sprayer or into a pre-wet combi salt spreader that moistens the spreading material. The integrated tanks in the double walled hopper body holds up to 315 gallons of liquid. The spreader can also optionally be equipped with a 6'7 dual spray bar or a hose reel with hand-held spray nozzle. This multi functional sand and salt spreader is for trucks from 1/2 ton up to 15000 lbs GVWR.

HTRACK(tm) TRACKING SYSTEM

This sand & salt spreader is compatible with our HTrack(tm) tracking software. You can track and manage all of your spreading devices online on your computer, tablet or smartphone. The program shows treatment route and spreading details on the map in real-time or between specific time intervals. Spreading route details such as speed, GPS location and material used can be summarized and generated as PDF reports.
