Description

2027 Nexhaul 6x10 Dump Trailer – 10K GVWR Heavy Duty Workhorse

The Nexhaul 6x10 Dump Trailer with a 10,000LB GVWR is built to handle demanding jobs while remaining compact and easy to maneuver. Designed for contractors, landscapers, and property owners, this trailer delivers serious hauling capability with rugged steel construction and dependable hydraulic dumping performance.

Supported by tandem 5,200LB axles with electric brakes, this trailer provides the strength and control needed for hauling heavy materials such as gravel, dirt, debris, and equipment. The double eye suspension improves stability while EZ lube hubs help simplify routine maintenance.

The hydraulic dump system uses dual cylinders with power up and power down functionality, giving you smooth lifting and controlled dumping when unloading material. A lockable front toolbox protects the hydraulic pump, super duty battery, and wiring, while the wired remote allows easy operation from outside the trailer.

The heavy duty dump bed features an 11 gauge steel floor and a 72 inch wide bed designed to maximize hauling capacity. With a low 23 inch bed height, loading materials and equipment is easier and more efficient. A rear barn door gate provides flexible unloading options, while stake pockets allow the addition of side boards when needed.

Inside the bed, four heavy duty D rings allow cargo to be secured during transport. LED lighting improves road visibility while the breakaway kit, safety chains, and 7 way RV style plug complete the towing package.

Finished with heavy duty steel wheels and a durable powder coated finish, the Nexhaul 6x10 10K dump trailer is built to deliver years of dependable performance.
