Description

The 2027 Stealth Cobra Premium Snow Trailer takes the same aluminum Cobra platform and adds the finished interior, upgraded trim, and expanded lighting package expected in a premium snowmobile trailer.
Built on a 2" x 6" welded tubular aluminum main frame, the Cobra Premium combines lightweight construction with a 7,000 lb GVWR and tandem 3,500 lb brake axles. The 16" on-center floor, wall, and roof construction provides a solid foundation for hauling snowmobiles and gear throughout the winter.
Inside, the Premium package adds white vinyl-finished sidewalls and ceiling, ATP corner molding, and a 12" ATP kick plate for a cleaner, more finished appearance. The LIGHTLID translucent roof provides natural light during the day, while the upgraded LED lighting package makes loading, unloading, and working around the trailer easier after dark.
