Description

2026 Sure-Trac 7x20 Tube Top Utility Trailer (7K GVWR)

Upgraded with Curbside Side-Loading Gate for Maximum Cargo Versatility

---

Looking for the most reliable, heavy-duty utility trailer in North Jersey? Roxbury Trailers in Wharton, NJ, has the Sure-Trac 7x20 Tube Top Utility in stock—now upgraded with a factory-installed Curbside Side-Loading Gate.

This isn't your standard, flimsy angle-iron trailer. It is the industry's flagship utility model, built for commercial crews and powersports enthusiasts who need lasting structural performance and effortless loading flexibility. By adding a rugged side-access gate on the curbside (passenger side), this configuration allows you to side-load equipment, ATVs, or palletized materials without needing to back everything down the entire length of the 18-foot deck.

Why the "Tube Top" Matters

Most utility trailers utilize cheap angle iron for the top rail, which easily bows, bends, and twists under load. Sure-Trac constructs the top rail out of 2" x 2" structural steel tubing, full-seam welded to the uprights. This creates a highly rigid "box frame" effect that stops chassis twisting and provides an unyielding anchor structure—whether you are hauling commercial mowers daily or strapping down heavy machinery for a weekend run.

Side Gate	Upgraded Curbside (Passenger Side) Loading Gate
Running Gear	(2) 3,500 lb. Spring Brake Axles
Decking	2" x 6" Pressure-Treated Pine Wood Flooring
Lighting	Full DOT Compliant LED Lighting Package

Key Professional Features

• Upgraded Curbside Side-Loading Gate: Designed for ultimate workspace efficiency, the side gate allows you to quickly side-load a secondary machine, an ATV, or a pallet of materials using a forklift. This keeps your loading layout highly organized and saves you from constantly rearranging your main cargo.

• Heavy-Duty Ramp Gate: The rear features a reinforced "ladder style" ramp gate with a built-in spring assist, making it easy to lift and lower with one hand. When towing empty, the gate folds completely flat onto the deck to drastically reduce wind drag and improve fuel efficiency.

• Wrapped Tube Tongue & Set-Back Jack: The main tongue is constructed from heavy-duty channel steel, wrapped back into the frame. The 2K tongue jack is set back behind the coupler, providing total tailgate clearance for your tow vehicle when making tight turns.
• Industrial Finish & Board Retainers: Protected by an industrial-grade polymer powder-coat finish to resist rock chips and road salt. The pressure-treated wood decking is secured with steel board retainers at the ends to completely prevent warping and cupping over time.
• Towing Stability: The dual-axle configuration with electric brakes on both hubs ensures excellent highway tracking, superior weight distribution, and reliable stopping power when hauling at capacity.

Perfect For:

• Landscaping Professionals: Side-load a walk-behind mower, blower rack, or fertilizer spreader on the front via the curbside gate, while loading your primary zero-turn mower on the rear.
• Powersports & Recreation: Ideal for hauling multiple ATVs or a side-by-side. Side-load one ATV sideways on the front deck and drive a full-sized UTV straight up the rear ramp.
• General Contractors: Easily side-load building materials or standard pallets with a forklift, leaving the rear open for tools, lumber, and heavy jobsite gear.

Pricing & Yard Terms

• Price: Cash/Check Price
• Processing Fees: A 3% processing fee applies to credit card transactions.
• Dealer Fees: $0. We charge absolutely zero documentation, prep, or administrative fees.
• Documentation: Temporary license plate/transit registration included with all trailer purchases.
• Sales Tax: NJ residents pay 6.625% sales tax at purchase. Out-of-state buyers pay applicable sales tax when registering the unit in their home state.
• Availability: Side-gate upgraded Tube Tops are highly sought-after multi-use platforms and turn over quickly. Please call the shop directly to confirm current lot availability!
