Description

2027 Sure-Trac 7x20 Tube Top Utility Trailer (10K GVWR)

Upgraded with 7ft wide Curbside Side-Loading Gate & Adjustable Coupler
Looking for a heavy-duty, high-capacity utility trailer in North Jersey? Roxbury Trailers in Wharton, NJ, has the Sure-Trac 7x20 Tube Top Utility 10K in stock—upgraded with both a factory-installed Curbside Side-Loading Gate and an Adjustable 2-5/16" Coupler.

Built on twin 5,200 lb braking axles with a massive 7,130 lb net payload capacity, this commercial powerhouse is engineered for heavy equipment, multi-vehicle transport, and daily contractor abuse. The 20-foot deck paired with a curbside (passenger side) side-access gate allows you to side-load mowers, ATVs, or palletized materials without needing to back cargo down the entire length of the trailer.

Why the "Tube Top" Matters

Standard utility trailers rely on light angle iron for the top rail, which flexes and twists under heavy loads or tight tie-down tension. Sure-Trac constructs the upper framework out of continuous 3" x 2" structural steel tubing, full-seam welded to heavy-duty uprights. Combined with a reinforced 5" x 3" angle frame and 5" channel tongue, this rigid box-frame design stops chassis twist and ensures long-term structural integrity under commercial work.

Decking 2" Pressure-Treated Pine Wood Flooring w/ Board Retainers
Lighting Full DOT Compliant Sealed LED Lighting Package

Key Professional Features

• Upgraded Adjustable Coupler: Mounts on an integrated front channel, allowing you to quickly raise or lower the 2-5/16" coupler height so your trailer stays perfectly level behind different tow

vehicles and work trucks.
• Upgraded Curbside Side-Loading Gate: Allows fast forklift side-loading of pallets or easy drive-on loading for a secondary walk-behind mower, UTV, or ATV near the front of the 20-foot deck.
• Heavy-Duty 10K Frame & Brakes: Built around a 5" main frame and continuous 5" channel tongue with electric brakes standard on both 5.2K axles, giving you total stability and lawful stopping power under heavy loads.
• HD Ramp Gate & 7K Set-Back Jack: The rear features a reinforced ladder-style gate with integrated spring assist for one-handed operation that folds flat inside the deck when towing empty. The upgraded 7K drop-leg jack is set back on the tongue so your truck's tailgate opens freely without striking the jack handle.
• Industrial Powder Coat & Steel Board Retainers: Finished in a baked-on industrial polymer powder coat to fight off road salt and rust. Steel retainers at the deck ends lock down the pressure-treated pine wood flooring to prevent board cupping and twisting over time.

Perfect For:

• Commercial Landscapers: Side-load smaller walk-behinds or equipment on the front via the curbside gate while pulling two full-sized zero-turn mowers up the rear ramp.
• General Contractors: Haul heavy skid steer attachments, compact tractors, or equipment with room left on the front deck for jobsite toolboxes and materials.
• Powersports & Multi-Vehicle Hauling: Transport a full-sized UTV alongside multiple ATVs easily by loading from both the side gate and rear ramp.

Pricing & Yard Terms
• Price: Cash/Check Price Listed
• Processing Fees: A 3% processing fee applies to credit card transactions.
• Dealer Fees: $0. We charge zero documentation, prep, or administrative fees.
• Documentation: Temporary license plate/transit registration included with all trailer purchases.
