Description

The Single Axle Tilt Bed Equipment trailer is a versatile and robust transport solution designed for a variety of compact equipment. Available in multiple configurations, including 10-foot and 12-foot models with GVWR options of 6K, 7.8K, and 10K, this trailer caters to a range of hauling needs.
Key Benefits

- HD Tube Bulkhead -- Provides additional rigidity to the front end of the trailer as well as providing an extra level of comfort when loading equipment.
- HD Diamond Plate Knife Edge Tail -- Provides a sharp, angled edge that creates a smooth transition for easy loading of equipment with smaller wheels.
- (4) 1/2? D-Rings -- Securely tie down your cargo with these heavy-duty anchor points, providing extra stability and safety during transport.
- Stake Pockets and Rub Rail -- Enables you to customize the trailer’s configuration to meet your specific hauling needs and provide support and a more finished look to the trailer.
- A-Frame Toolbox -- Securely mounted in the tongue of the trailer, our A-Frame Toolbox provides easy access to the tools and equipment you need on the job.
- Hydraulic Dampener -- No more uneasy tipping points and having the bed slam down. This cylinder provides a smooth, controlled tilting motion to make loading stress free.

One of its standout features is the tilt bed design, which simplifies loading and unloading of equipment such as scissor lifts, mini trenchers, and other compact machinery. This easy-access functionality saves time and effort, making it a valuable tool for contractors and landscapers alike. For added versatility, you can enhance the trailer with a 4-foot stationary deck, perfect for carrying attachments, pallets, or other materials to the job site. This feature expands the trailer's utility, allowing you to transport a wider variety of items efficiently.
Constructed for durability, the Single Axle Tilt Bed Equipment trailer is built to withstand the rigors of daily use while providing a smooth towing experience. Its robust design ensures stability and safety while on the road, so you can transport your equipment with confidence.
Whether you’re a professional contractor or a weekend DIY enthusiast, this trailer is designed to meet your specific hauling requirements. With its flexible configurations and thoughtful features, the Single Axle Tilt Bed Equipment trailer is an essential asset for anyone needing to transport

compact equipment and materials efficiently.
