Price: \$10,900.00

Description

Core Specifications & Framework
The structural build and mechanical capabilities of this specific 36-foot dual-axle configuration include:
Frame Foundation: Constructed with a heavy-duty 12" I-beam main frame reinforced by an upgraded 22 lb/ft I-beam profile, a 5-inch round torque tube, and a supporting bridge frame to mitigate deck sagging under heavy centralized loads.
Deck Properties: Offers a standard 102-inch overall width utilizing a 2-inch treated lumber deck flooring flanked by 4 welded D-rings. Perimeter securing consists of a continuous 2" rub rail, stake pockets, and chain spools.
Standard Component Features
Running Gear: Dual 12,000 lb leaf-spring axles fitted with heavy-duty electric-over-hydraulic brakes and standard 16" dual black mod wheels
Coupling & Stabilization: Features a Grade 50 one-piece gooseneck neck assembly with an adjustable 2-5/16" ball coupler (rated for 25,000–30,000 lbs). The "HYD" designation pairs this with dual two-speed hydraulic drop-leg jacks.
Storage & Utility: Built with a front lockable toolbox nestled securely between the gooseneck risers, an integrated winch plate, a chain rack, and an additional underbody storage toolbox.
