? BLACK RHINO TILT SERIES – STRONGER. SMARTER. AWARD-WINNING.
WHY BLACK RHINO ALUMINUM TRAILERS?
Superior Construction & Design -
? High-quality North American extruded tubular aluminum construction
? Triple tubed tongue – welded solid to 3 of the cross members below deck
? Premium welding wire; produces 25% stronger welds
? EZ Lube rubber torsion axles with chamber
? LED lighting package
? Top-of-the-line 4-pin full jacketed power
? Aluminum wheels & radial tires
? Side mount swivel wheel jack
? Heavy duty 4-sided stake pockets for securing loads
? 1" Aluminum durable decking - lightweight, more corrosion resistant
? 3-year structural warranty
CERTIFICATIONS: NATM (National Assoc of Trailer Manufacturers)
COUNTRY OF MANUFACTURE: Proudly built in Cincinnati, OH USA
Optional Features
Spare Wheel & Tire
Spare Mount (Bolted) – can take it off to modify
Add D-Rings
BETTER QUALITY:
Our Black Rhino Aluminum Trailers are designed with durability and long-term use in mind. Each of our trailers is constructed with 5052-grade tubular aluminum by expert welders using the highest-grade welding wire available. Most of our trailers utilize a "Wishbone" style tongue/A-Frame design for strength and durability. You won't find structural components and cross-members built from an angle or channel like many other manufacturers. Plus, the components (including axles, wheels, tires, and electrical) on our Black Rhino Aluminum Trailers are all second to none. It's this combination that will give you the confidence and assurance that the trailer will last for years to come.
OUR "FULL CONTACT" DESIGN
We use tubular aluminum for all structural components of our trailers, which adds strength to the trailer and provides 4 welds at joints versus 2 or 3 with angle or channel. So, when you take closer

inspection of our trailers, you'll be happy to notice our "Full Contact" manufacturing and design. Simply put: We weld everything! Our expert welding technicians take their time to ensure that each and every point of contact is welded with precision. These additional welds create a stronger, more durable aluminum trailer that can easily hold up to the constant abuse that most trailers endure, and we think the additional peace of mind is well worth it.

EASY LOADING & UNLOADING All of our Black Rhino Aluminum Trailers are designed with easy loading and unloading in mind. Our heavy-duty fold-down ramps make loading and unloading cargo or equipment a breeze, while our high-quality torsion or leaf spring axle options from Lippert, Dexter, or Terran ensure that you have a smooth ride once loaded and ready to go. Plus, all of our trailers come standard with 2" sealed coupler, so you can tow your trailer with your vehicle for peace of mind that it is attached securely.

To LIVE & WORK AGGRESSIVELY, a quality trailer that will endure the rigors of hauling ATVs, UTVs, Motorcycles, equipment, vehicles, lawnmowers, and anything else you can think of, is essential.

STANDARD FEATURES AND OPTIONS

We take pride in building trailers that will go the distance with you.

A Black Rhino Trailer is built for the long haul. It is easy to maintain and will withstand many years of use, even in the difficult Northern climates and coastal climates, a true all-season trailer.

Black Rhino’s standard features are considered upgrades on many other brands of trailers.

WHY ALUMINUM TRAILERS?

ALUMINUM vs. STEEL

? Aluminum trailers are 30-35% lighter than steel, thus offering:

? Higher payload capacity

? Better towing fuel mileage

? Easier to pick up and maneuver

? Aluminum is much more corrosion-resistant than steel

? Aluminum trailers are easier to maintain and last longer than steel

? Aluminum trailers have higher resale values than steel
