Removable Fenders
Overview
The CAM Superline Power Tilt Car Hauler Trailer is engineered for the owner who wants to eliminate the stress of loading. As a premium car hauler trailer, it removes the guesswork of steep angles and unaligned ramps. By combining lightweight aluminum construction with a high-capacity tilt bed trailer design, this model ensures that the most critical part of your journey—the load—is also the easiest.
Frame and Construction
This car hauler trailer is built on a high-strength aluminum frame designed for maximum durability and reduced towing weight. The 12V hydraulic pump is housed in a protected enclosure, while the fully sealed wiring harness and LED lighting system ensure long-term reliability on the road.
Exterior Features
The low-profile design is enhanced by professional-grade securement options, including four 1/2" D-rings and a standard rub rail. The included bulkhead and bolt-in toolbox provide a clean, organized look that reflects the premium nature of the CAM Superline brand.
Loading Features
Loading is designed to be smooth and predictable. With the push of a button, the deck tilts to meet the ground, protecting front splitters and underbody components from damage. The smooth-action hydraulics provide total control, making this tilt trailer the premier choice for hauling performance cars and specialty vehicles with complete peace of mind.
Contact us for an exact out the door total.
